

Personal Portfolio Website – GitHub Repository Report

Project Description

This is a responsive personal portfolio website built using HTML5, CSS3, and basic JavaScript. The website showcases personal information, skills, education, projects, and contact details with a modern and user-friendly design.

Features

- Home section with introduction
- About Me section with tabs (Skills, Experience, Education)
- Portfolio section displaying projects
- Contact section with social links
- Responsive design and smooth scrolling

Technologies Used

- HTML5
- CSS3
- JavaScript
- Font Awesome Icons

Project Structure

index5.html – Main HTML file

style5.css – Styling file

README.md – Documentation file
